6.1.2 - The effective leadership is visible in various institutional practices such as decentralization and participative management.

Mentorship and participation in workshops or conferences can greatly contribute to understanding and practicing effective leadership, especially in the context of institutional practices like decentralization and participative management. The college operates a mentor-mentee program with a student-teacher ratio of 1:25, aiming to provide effective mentorship to address both personal and professional challenges, including study-related issues. In this program, each student is paired with a mentor, fostering a supportive environment where individualized attention and guidance can be provided. The mentor-mentee relationships are designed to offer comprehensive support, allowing mentees to seek assistance with a wide range of concerns, from academic struggles to personal development goals. Mentors serve as trusted advisors, offering advice, encouragement, and practical solutions to help mentees navigate challenges and achieve their objectives.

Moreover, students actively participate in conferences, where they have the opportunity to showcase their academic achievements and engage with peers and professionals in their field. Notably, the college's students consistently excel in these conferences, as evidenced by their recent attainment of the first position in the scientific poster presentation category. This achievement reflects the dedication and academic excellence of the students, as well as the effectiveness of the mentor-mentee program in nurturing their talents and fostering a culture of scholarly inquiry. By participating in conferences and receiving recognition for their work, students are not only able to showcase their research and academic prowess but also gain valuable experience in presenting their findings and engaging with the wider academic community.

Overall, the mentor-mentee program and active participation in conferences contribute to the holistic development of students, equipping them with the skills, knowledge, and confidence needed to succeed both academically and professionally.

No. - 252

Revised Office Order

Date: 02/09/2023

It is for the information to all the stakeholders about the latest development in Mentor-Mentee Program. As part of our ongoing efforts to enhance the student experience and provide valuable support, list of mentor-mentee pairings has been revised. This updated list has been carefully considered and aims to provide the best possible mentorship experience for students. This program will not only benefit the students academically but also help them to develop strong personal and professional skills.

The following Assistant Professors have been assigned as mentors to the following students (for the session Aug-2023 to Dec- 2023):

Sr. No.	Name of Mentor	Designation	Sr. No.	Name	Sem.
1	Prof. (Dr.) Vivek Sharma	Director/Principal	1.	Sahil	7 th

Participation in National Conference at Maharaja Agrasen University, Baddi

Total 45 students of the 6th semester (Batch 2021-2025) of GCP Rohru, along with Assistant Professors Dr. Harish Kumar, Sh. Raneev Thakur and Ms. Shivani attended a National Conference at Maharaja Agrasen University, Baddi entitled “Future of Pharmacy: Emerging Trends & Opportunities” on 9-10 February 2024. The students had a great learning experience and the opportunity to interact with Sh. Montu Patel, the President of PCI (Pharmacy Council of India).

Participation in International Conference At Lovely Professional University

Aditi Kimteta a student of 6th semester (Batch 2021-2025) of GCP Rohru, secured 2nd position in scientific poster presentation at a International Conference entitled “International Conference on Recent Advances in Health Sciences” (ICRAHS-2024) organized by Lovely Professional University through virtual mode on 27th April, 2024.

Transforming Healthcare: The Impact of Artificial Intelligence and Machine Learning in Personalized Medicine
 Aditi Kimteta, Chetna Jhagta*
 *Assistant Professor (Pharmaceutical Chemistry)
 Government College of Pharmacy, Rohru, Distt. Shimla, 171207, Himachal Pradesh, India

Introduction
 Personalized medicine, also known as precision medicine, represents a paradigm shift in healthcare, aiming to tailor medical interventions to the individual characteristics of each patient. This approach recognizes that patients vary in their genetic makeup, lifestyle factors, environmental exposures, and disease manifestations, necessitating customized treatment plans to optimize outcomes.

Machine Learning (ML) is a branch of artificial intelligence (AI) and computer science that focuses on the using data and algorithms to enable AI to imitate the way that humans learn, gradually improving its accuracy. Precision medicine methods identify phenotypes of patients with less-common responses to treatment. AI provides sophisticated computation and inference to generate insights, enables and empowers clinician decision making through augmented intelligence.

Need for Personalized Medicine

Future Directions and Opportunities
 > Precision medicine market is expected to reach USD 132.66 billion by 2027.
 > AI provides Precision Diagnosis and earlier detection of disease.
 > By Predictive Analysis disease progression and treatment outcomes can be predicted.
 > It can be used for Drug Discovery as Development
 > AI can analyze real-time patient data to optimize treatment plans and dosage regimens based on individual responses.

Challenges and Limitations
 > Data Quality and Accessibility > Clinical Validation and Adoption
 > Algorithm Bias and Interpretability > Security and Privacy Concerns
 > Regulatory Hurdles > Ethical Considerations
 > Cost and Accessibility

A workflow for data integration for AI/ML modeling in Precision Medicine

Using Machine Learning (CURATE.AI) for two Drug Optimization

Name of AI	Indication	Subjects	Years
CURATE.AI	Multiple Myeloma	20 patients	2019-present
CURATE.AI	Liver transplant immunosuppression	75 patients	2019- present
CURATE.AI	Cognitive training	100 individuals	2019- present
CURATE.AI	Metastatic prostate cancer	1 patient	2018
PPM	Acute lymphoblastic anaemia	2 patients	2016

Conclusion
 The convergence of AI, ML and personalized medicine heralds a new era in medicine. We have the opportunity to revolutionize healthcare delivery, improve patient outcomes, and ultimately transform the way we approach health and wellness. In spite of the challenges, AI driven innovations serve the best interests of patients and society as a whole.
